eco-logic books

practical solutions to environmental problems

www.eco-logicbooks.com

● Books Available ● Mail Order Catalogue No. 18

Welcome to eco-logic books, we are a small, ethically run company that specialises in the mail order selling of books and other media that promotes practical solutions to environmental problems.

Unlike some online booksellers we do not list every book in existence - those in our catalogue and on our website at www.eco-logicbooks.com have been chosen by us or recommended by you, our customers, as being 'top in their class'. This filtering process takes much time and energy. So, we really appreciate those of you who have supported us by buying direct from us rather than searching the electronic highways and byways to save a few pennies. May your pages turn freely.

To save paper, if you would rather have the catalogue sent to you as a .pdf file via e-mail, that can be easily arranged - just send us your email address.

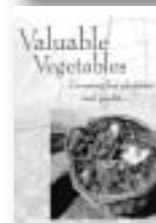

If you would like to order some books from this catalogue (and we sincerely hope you will),

carefully remove the back page, fill out the order form and enclose your payment. With a spot of folding and cellotaping the page makes a return envelope. Better still, if you could send us your order in a used jiffy bag or padded envelope we can reuse it. If you have a large supply of used jiffy bags tucked away somewhere we would be happy to collect them - just email us at the address below.

We've learned over the years that you love a bargain, so scattered throughout the catalogue are books marked down in price or POST FREE. Sadly this post free offer applies to mainland Britain only.

Buying books mail order can be a bit of an adventure so if you are dissatisfied with any of the books you receive from us, return them as soon as possible in perfect condition and we will refund the price. Finally, we don't want to send our catalogue to anyone who doesn't want it so if you would like to be taken off the mailing list please let us know.

**Happy reading Peter, Sarah, Hugo
and the team at eco-logic**

GROWING UNUSUAL VEGETABLES

S. Hickmott

Splendid new book - over 90 unusual, edible vegetables - each plant comes complete with comprehensive cultivation instructions and fascinating notes on its origin, history and uses. Excellent book works on many levels: for the experienced gardener looking for something new; to the cook who wants a some delicious new foods for the kitchen; to those who think that the change in weather patterns will mean the need to grow new plants; and last but not least those who like to bring some adventure into their gardening life. Thoroughly recommended. £15

VALUABLE VEGETABLES - GROWING FOR PLEASURE AND PROFIT

Mandy Pullen

If you are planning to grow veg on a large scale or to supply your own needs or to start a small business then this book is a 'must' divided into 5 sections with extensive appendices. The first section is Growing Skills which takes you from setting up your garden to getting it productive Including machinery; soils; building fertility and green manures; rotations; sowing and planting; protected cropping; storing your produce; irrigation; weed control; pests and

diseases; and seed saving. Then there are 3 sections with complete cultivation details for over 75 vegetables, herbs and soft fruit. The next section covers all the skills needed to sell your vegetables, keep accounts, work with volunteers and find and keep customers. Lastly there are extensive appendices - how to build a propagator, erect a polytunnel, what to sow when, useful addresses etc. A superb, comprehensive work. £20

MOON GARDENING

R.J. Harris

Based on Mr Harris' years of experience as a head gardener it offers his experience in growing all sorts of things. Set out in a highly prescriptive fashion we found the book fascinating and full of ideas worth trying. Do not be frightened by the picture of the author on the cover - this is a very interesting book. £13.95

LITTLE BOOK OF SLUGS

Ghastly things and the bane of my life - so I'm pleased to see this book with over 70 different organic ways to banish them - not a slug pellet in sight. £4.99

ENCYCLOPEDIA OF ORGANIC GARDENING

Ed. P. Pears

Produced in association with the HDRA (the organic gardening organisation) this is probably the most comprehensive large format, organic gardening book on the market today. £25

ORGANIC GARDENING

S. Stickland

Don't worry if you haven't got £25, this book

will provide you with a wealth of information for a reasonable £8.99

WEEDLESS GARDENING

L. Reich

Pay attention to the top few centimetres of soil and let nature look after the rest. Save yourself a lot of backache with this very useful book about the no dig method - full of hints, tips and bright ideas. £6.99

GARDEN RETREATS

D. Stiles

Garden swing, rose arbor, gazebo, potting shed and lots of other inspiring projects for turning your garden into a place of beauty and tranquility. £14.95

LIQUID GOLD

C. Steinfield

'A short history of urine (and safe ways to use it to grow plants)'. Why throw away a valuable resource? £9.95

GREEN GARDENING

National Trust

Based on 10 case studies from NT properties - not an organisation usually associated with cutting edge organics. However I was very pleasantly surprised by this book mainly because of the workable, practical ideas that can be gleaned from its pages. I also liked the potted history of each site and the short biography of each gardener, also the fact that you could visit the gardens mentioned and see the work in progress. £12.99

WINDOW BOX ALLOTMENT*P. Bennett*

Sweet little paperback book - takes the spatially challenged gardener through the year with month by month guidelines on what can be achieved in a space as small as a window box. There's always something good to grow. £6.99

WEEDS*John Walker*

Sub-titled - An earth-friendly guide to their identification, use and control. This is an all too rare example of a mainstream book with new and worthwhile content. Full of all sorts of goodies - ground clearing without digging, identification, chemical free weed control methods, weeds for wildlife and a whole lot more. I love it. £12.99

DRIP IRRIGATION FOR EVERY LANDSCAPE AND CLIMATES*R. Kourik*

Drip irrigation is a very useful technique for getting a constant supply of water to exactly where it is needed. Detailed plans to help your garden flourish while conserving water. £12.95

ACCESSIBLE GARDENING*J. Woy*

Subtitled 'Tips and Techniques for Seniors and the Disabled'. Constructing raised bed planters, modifying an existing garden, ergonomic tools, manageable watering & pest control, specifications for path and inclines, and lots of other stuff. A very useful book. £13.99

THE PERMACULTURE GARDEN*G. Bell*

The only practical book that concentrates on permaculture gardening in the British Isles. Well written with lots of excellent, clear, illustrations this book shows how the smallest backyard or the brambliest allotment can be transformed from a green desert to a beautiful and productive garden. Read it before you put spade to earth. £9.99

● **SPECIAL OFFER:** Buy this book and get your whole order POST FREE

PRACTICAL ALLOTMENT GARDENING*C. Foley*

A very nice introduction to gardening on an allotment - shiny, hardback book with lots of colour pictures. Breaking in a new plot, plants to grow, harvesting, pests and so on. £12.99

THE ART OF ALLOTMENTS - CULTURE & CULTIVATION*D. Crouch*

Where culture and cultivation collide. Artichokes and art, spinach and sculpture, installations and iceberg lettuces (enough, enough) and two of my favourite all time photos. A bit expensive but a very fine book. £10.99

THE ALLOTMENT HANDBOOK*S. Andrews*

A guide to promoting and protecting your site. Allotments are increasingly coming under threat of development as land prices soar and space is needed to expand our cities, towns and villages. Starting with a brief history of allot-

ments and a look at the legislation surrounding them, this book shows how you can make your allotment site part of a thriving, local community. And if the worst happens, and your site comes under threat, how to organise yourself to stop the devel-

opers in their tracks. Presented in a logical and easy to use format with a comprehensive and extensive contacts list. A vital tool for allotment holders and community groups as well as those who want to see an active use of our urban open spaces. £5.95

THE ALLOTMENT - ITS LANDSCAPE AND CULTURE*Crouch & Ward*

Explores the history and culture that have grown up around the allotment. Rich in local history and anecdote the allotment looks at regional variations as well as alternative uses and recent changes. £12.99

BIO-DYNAMIC GARDENING*J. Soper*

Based on the work of Rudolf Steiner, bio-dynamic gardening is a sort of organic gardening 'plus'. For years this has been the best of a poor crop of books on this fascinating subject and now we are pleased to offer this new and revised edition. Goes well with 'Working with the Stars', the bio-dynamic planting guide. £10.99

WORKING WITH THE STARS - 2004*M Thun*

The first and best of astrological gardening calendars. If you haven't tried gardening using these methods give it a go - you have nothing to lose and everything to gain. Ready now. £6

GARDENING FOR HEALTH & NUTRITION*H. Philbrick*

A welcome return to this long out of print introduction to the methods of biodynamic gardening. One thing I find fascinating about biodynamic gardening is the emphasis on life - not the standard gardening philosophy of getting rid of things like bugs, weeds, fungi etc. £7.95

HUGO ERBE'S NEW BIODYNAMIC PREPARATIONS*Trans. P. Carline*

Hugo Erbe took Rudolph Steiner's ideas and developed them to produce new preparations and techniques. Everything a book should be - printed in the UK on recycled paper, out on the edge and very interesting. Probably not for the beginner. Love it. £12

FOREST GARDENING*Robert Hart*

New expanded edition which describes in much greater depth the principles, philosophy and practice of setting up a forest garden, including design, maintenance and recommended species. Good chapter on the author's own experiences. £10.95

HOW TO MAKE A FOREST GARDEN*Patrick Whitefield*

Years of experience go into this practical manual. Written for our temperate climate with masses of illustrations, plans and species lists. The principles outlined are good for any size of garden and this well thought out book has all the information you need to design and install your own forest garden. £14.95

PLANTS FOR A FUTURE*Ken. Fearn*

The book, based on Ken's ground breaking work, contains details of 100s of crops that produce something we can eat. The emphasis is on bushes and trees but there is a lot of fascinating information for all sizes of plot. Essential resource book. £16.95

GARDENING - PLANT VARIETIES**CORNUCOPIA - A SOURCE BOOK OF EDIBLE PLANTS***S. Facciola*

An astonishing piece of work. Over 700, A4 pages of close typed text, no pictures, no charts, no padding, just a great list of edible plants (and fungi and bacterium). Each species has a host of varieties, cultivars, uses, interesting facts and cultivation details and a supplier. The downside of this masterwork is that it is mainly America centred and most of the suppliers are in the US, but hugely useful and interesting anyway. £32

GROWING POTATOES**GROWING TOMATOES**

Sound information for the beginner and not quite expert on growing these favourite garden vegetables. Nicely produced hardback books. £6.95 each

DELIGHTFUL DELICIOUS DAYLILLY*P. Gail*

Delightful blossoms that can be made into a variety of toothsome dishes (I didn't even know it was edible) Cultivation and recipes. £5

MELONS*A. Goldman*

'The' book on Melons. Loads of practical advice on growing, picking and pollinating these fabulous fruits. Great colour photos for identification and dribbling over. £18.95

BAMBOOS*C. Recht*

Such versatile plants - they look nice, you can build with them, eat them, make windbreaks, screens and so on. A 'normal' gardening book with all the info you will need to grow these wonderplants together with species and cultivar information for our temperate gardens. Comprehensive and good to look at. £17.99

THE BOOK OF BAMBOO*D. Farrelly*

Comprehensive (and then some) guide - history, 1000 uses, cultivation, harvest, botany and so on and so on - a classic book. £16.95

GARLIC AND FRIENDS*P. Woodward*

Garlic, chives, garlic chives, elephant garlic, tree or Egyptian onions, leeks, ordinary onions, shallots, rakkyo, ramsons, Welsh onions and so on. History, growth, storage, propagation, cultivation, storage and use of edible alliums. Not a lot more to add, excellent hardback for the allium aficionado. £22

THE PERFECT PUMPKIN*G. Demerow*

All you need to know about pumpkins - growing and harvesting, carving & craft projects, recipes and tips on winter storage including freezing & drying. The best (and possibly only) book this on superveg. £9.99

CHILLI PEPPERS*B. Hanson (USA)*

History, cultivation, harvesting, preserving, cooking with, pests and disease remedies and details of 50 varieties. Worth the money alone for the tip on how to see how hot a chilli is. £8.00

**CURRANTS & GOOSEBERRIES £8
BLACKBERRIES & RASPBERRIES £10**

These two soft cover bookettes make a welcome contribution to an area about which there is little solid information. Most known cultivars and their characteristics are listed in table form as well as growing, pruning and propagation details. Did you know there are over 240 gooseberry cultivars?

ORGANIC STRAWBERRY PRODUCTION

Growers guide to the above - written for large scale producers but very useful for the gardener - good pest & disease identification. £8

MEDICINAL HERBS*Sturtivant & Blakely*

This book fills a hole in the herb book list. The upside is a huge amount of info, techniques and down to earth practicalities of growing and preserving medicinal herbs. The downside is that it is American so some of the info is not relevant. On balance, if you want to grow medicinal herbs you will need this book. £19

GARDENING SKILLS**BACK GARDEN SEED SAVING - KEEPING OUR VEGETABLE HERITAGE ALIVE***Sue Stickland*

Sustainable gardening is not only about how you grow but also what you grow. Find out about vegetable varieties no longer found in seed catalogues: meet the gardeners who grow them, their tales and tips, and their infectious enthusiasm for their subject. Most importantly, top gardening writer Sue Stickland gives easy to follow crop-by-crop guidelines to help you save seed for yourself and varieties to look out for. Based on the Heritage Seed Search work done by the HDRA, this book is a must for all who care about preserving their vegetable her-

itage or just growing good tasty vegetables for their table. £12.95

● SPECIAL OFFER: *Buy this book and get your whole order POST FREE*

BUILD YOUR OWN GREEN HOUSE*M. Freeman*

Eleven specific examples from simple cold frames to large freestanding and attached to the house structures. From selecting a site and laying a foundation to installing wiring. With the info from this book and some rudimentary tools I'm sure you could build your own greenhouse. No throwing stones though. £14.95

GROWING UNDER GLASS - WITHOUT USING CHEMICALS*S. Stickland*

The title explains it all - jolly good book. £7.95

GREAT GARDEN COMPANIONS*S. Cunningham*

Companion planting is the technique of growing special combinations of flowers, herbs and vegetables to deter pests and minimise disease. This the best book (still in print) on the topic - lots of organic cultivation ideas. Some swear by it some swear at it - make up your own mind. £12.95

DESERT GARDENING FOR BEGINNERS*C. Guy*

For all our customers in Spain and France (and East Anglia) a useful intro to gardening in arid places. Good holistic approach from the authors

who work as researchers at the University of Arizona - so they should know. Improve desert soils, grow healthy vigorous plants. £6.95

LIBERATING LAWN

R. Castle

Turn your lawn from a green, chemical absorbing, desert into a thing of beauty. And you can do this without the neighbours complaining or wildebeest making their homes in your front garden. £8

NO WORK GARDEN

B. Flowerdew

Lots of common sense stuff from the great Bob - promoting and explaining environmentally sound strategies for the minimum amount of work. Nicely produced hardback book for beginners and experienced alike. £19.99

- SPECIAL OFFER: *Buy this book and get your whole order POST FREE*

THE EDIBLE CONTAINER GARDEN

M. Guerra

Not having a great deal of space need be no barrier to a productive garden. In this book we are given plans and designs to allow us to use every inch of space in a productive and organic way. Beautifully illustrated with photographs, and packed full of good workable ideas. £11.99

HOW TO GROW MORE VEGETABLES (than you ever thought possible on less land than you can imagine)

J. Jeavons

Crazy title, crazy guy, and the best book on

raised bed gardening. Increase the yield from your plot. £14.95

SQUARE FOOT GARDENING

M. Bartholomew (USA)

Too often gardeners become dispirited when faced with planning and organising their garden - an excellent strategy is to deal with a small section at a time and when that is under control

move on to the next bit. Maximise yields and minimise hassle with the methods set out in this very useful book. £12.95

START WITH THE SOIL

G. Gershuny

An accurate and easy to use organic book about soil. Identify and cope with problem sites and soils, choose plants for your soil conditions, plan and implement a soil care system for your very own garden. Usually £10.95 now only £6.95 (Limited Stock)

RECYCLING, COMPOST & POO

CRADLE TO CRADLE

W. McDonough

Subtitled Remaking the Way We Make Things. This radical book should be compulsory reading for all recyclers and those in the 'business'. A new paradigm that moves on from the one way 'Cradle to Grave' thinking to a complete reuse cycle - thus 'Cradle to Cradle'. Radical book

construction means that you can read it in the shower (should you be so decadent) £19.95

THE REVERSE GARBAGE MULCH BOOK

S. Clayton

Any book that has chapters entitled 500 free and nearly free mulches gets my vote. Magnificent mulch - what it does, how to do it and why bother in the first place. Lots of great gardening ideas. £10.99

BEYOND THE BIN

J. Budd

Easy readable intro to the whole topic of reusing and recycling. Specially good for young adults and those who need to explain stuff to the not totally committed. Time taken for an aluminium drink can to degrade - 80 to 100 years. Buy it and spread the word. £4.99

CRAFTY CONTAINERS

L. Walpole

Weave coil and plait a whole variety of containers from reused materials. The odd ones are a bit naff but generally they are useful and good fun. I am particularly keen on the bowl made out of old tetrapacks. £8.95

DUMPING THE DIAPER

A reuseable nappy report - mainly for policy makers and practitioners - contains facts and figures (including a frightening disposable nappy calculator for landfill purposes), action plans, how to set up partnerships, case studies, recommendations and contacts. Excellent piece of work. In English or Welsh £15 each

COUNTRY PLUMBING*G. Hartigan*

The only book I know that approaches the topic of the septic tank with a great deal of common sense and a dash of good humour. If you've got one you'll want to buy it. £8.50

SEPTIC SYSTEM OWNERS MANUAL*Khan & Jones*

Surprising amount of good information in this book; tanks, drainfields, microorganisms, gravity power, tank pumping, inspections, system failure, sand filters, grey water, compost toilets and a whole heap more. Very interesting potted history of wastewater disposal. £10.99

HOW TO SHIT IN THE WOODS*K. Meyer*

A customer favourite - now in its second edition. We expect dog owners to pick up their pets' poo yet on an amble on Dartmoor the other day the piles of human excrement and decomposing loo paper made the whole thing a nasty experience. As it is an American book some of the products mentioned are a tad hard to get hold of. But worth the wedge for the new crop of 'worst experience' stories and how and where to use a spade. Learn how to do it properly. £6.99

LIFTING THE LID*Harper & Halestrap*

The latest and best from the top toileteers at CAT. Starting with an overview of the WC and moving through the design and construction of dry and compost toilets, septic tanks, water conservation and low flush toilets, greywater systems

and ending with a fascinating section on nutrient flow and cycles, all backed up with case studies. A star book in the ecological toilet systems ferment. Highly recommended. £12

SEWAGE SOLUTIONS*N.Grant & M.Moodie*

Excellent book from experts in the field. After first explaining the nutrient cycle and the scale of the problem, Sewage Solutions takes a realistic look at all the disposal methods available for 'black' & 'grey' water - from septic tank to compost toilet, with good explanations on how each one works. It also casts a measured eye over the fashionable 'reed bed' solution for waste disposal and often comes up with better solutions. Excellent book. £12

THE COMPOSTING TOILET SYSTEM BOOK*Porto & Steinfield*

Composting toilets are probably the best way to deal with human waste, especially on the smaller scale. Far from being just holes in the ground with accompanying nasty niffs they are now sophisticated pieces of kit. A timely and comprehensive book on the whole topic. Recommended. £19.99

SEPTIC TANKS - AN OVERVIEW*Moody & Grant*

The best short tract on septic tanks. £5

THE RODALE BOOK OF COMPOSTING*Ed. Martin & Gershunny*

In our opinion the most comprehensive composting book in print. From the 'History of Composting' through to the 'Frontiers of

Composting' with a meander through worms, compost structures, using manure, large-scale composting, shredders, using the stuff and a whole heap (geddit) more. The ultimate compost book. £10.95

FLOWFORMS (HUMAN WASTE, THE UNIVERSE & EVERYTHING)*Mark Moodie*

Dense text that very much repays a second reading from a man who builds systems to deal with aforementioned waste. Good intro to the philosophical side of the Biodynamic movement and the work of Rudolf Steiner and others, leading to the thinking behind the structure of the wonderful water sculptures/revitalisers known as Flowforms. £5.00

MULCH IT*S. Campbell*

A practical guide to using mulch in the garden and landscape. Appearance, insulation value, thickness, weed control, water penetration, moisture retention and rate of decomposition for more than 50 materials. £8.50

WORMS EAT MY GARBAGE*Mary Applehof*

Everything you have ever wanted to know about vermiculture (things wormy). Written by the 'World Queen of Worms' this book takes a practical and truly comprehensive look at all aspects of redworm composting. From the biggest gar-

den to the smallest flat, let tiger worms or brandlings turn your garbage into a valuable resource. £8.95

ORCHARDS & APPLES

APPLES: A FIELD GUIDE

M. Clark

At last an up-to-date colour apple identification book at a reasonable price. Contents include how to choose your tree, rootstocks, planting, pruning, propagation and 130 varieties shown in colour for identification purposes complete with flowering periods, keeping ability etc. Splendid book. £20

PEARS

J. Arbury & S. Pinhey

THE pear identification book - beautiful hardback at a beautiful price (limited number) - was £19.99 now £12.99

ORGANIC APPLE PRODUCTION

J. Bevan

One of the few texts to deal with the technical aspects of organic apple production on a larger scale. Very good section on identification and organic management of pests. £8

SUCCESS WITH APPLES AND PEARS TO EAT AND DRINK

A. Rowe

Mr Rowe is definitely on message in his hatred of imported New Zealand apples. Well constructed book with a great deal of useful information not found elsewhere, excellent on the various varieties to plant in your garden/orchard. £12.99

ALL ABOUT APPLES

A. Gilbert

We pondered long and hard about including this Tasmanian book. In the end we decided the excellent info on pruning, growing organically, simple grafting instructions, stuff on small scale orcharding (including a permaculture case study), care of your trees AND the fact that the climate in Tazzie is not too dissimilar to our own - made it well worth while. Go for it. £15.99

THE COMMON GROUND BOOK OF ORCHARDS

The creators of Apple Day explore how orchards shape our culture, from custom

to kitchen. Whether you want to create a community orchard, plant a new orchard, revive an existing one or just celebrate the diversity and beauty that orchards bring to our lives, this book is for you. Superb photos by James Ravilious and others, masses of illustrations and a heap of useful information - a book to treasure. £18.95

Huge amount of information in booklet form

Directory of Pear Cultivars £10

Plums £10, Cherries £8

Fruit Varieties resistant to Pests & Diseases £10

Hazelnuts £8, Chestnuts £8, Walnuts £8.

THE BOOK OF APPLES

Morgan & Richards

Hardback book with over 300 pages divided

into 3 sections: a history of the apple, a directory of all the species at Brogdale, and notes on their cultivation and cooking. Wonderful colour illustrations of the varieties mentioned. A splendid reference book. £35

CIDER MAKING ON A SMALL SCALE

Pooley & Lomax

Apparently you can use any type of apple to make cider and this book tells you how. Cider, perry, cider vinegar, apple juice and plans to build your own low cost apple press. Pick up those windfalls and get scrotting. £6

A HARVEST OF APPLES

R. Ward

More than just a recipe book - history, folklore and beautiful illustrations combine with a most comprehensive collection of apple recipes to make this book an absolute must for all cooks, gardeners and orchardists. £12.99

APPLES OF THE WELSH MARCHES

Delightful self-published book of the old varieties grown in the traditional orchards of West Midlands and Wales. £5.50

APPLES IN SCOTLAND

A practical guide to choosing and growing apples in (yes you guessed) Scotland £6.50

CIDER - making, using and enjoying sweet and hard cider

A. Proulx

Lots and lots of information for the cidemaker (includes vinegars and brandy) £10.95

CHICKENS & OTHER BEASTS

STARTING WITH CHICKENS

K. Thear

This excellent writer on poultry reveals everything the beginner needs to know about keeping chickens. £6.95

POULTRY FOR ANYONE

V. Roberts

Describes, with superb colour photos, 44 pure breeds of chicken, giving history, characteristics, breeding, appearance and special requirements. Lovely hardback book. £19.95

CHICKEN TRACTOR

Lee & Forman

Chickens are such splendid beasts - they produce eggs, manure, meat and will even dig and weed the garden. This great book outlines all the ways you can work with chickens to get a productive garden and healthy soil - it even has how to build a straw bale hen house. £14.95

KEEPING A FEW HENS IN YOUR GARDEN

F. Raymond

I think everyone should have a few hens in their garden. This bookette, with lovely line drawings, gives you all the info you need to have your own

salmonella-free, fresh eggs from your own happy, healthy hens. £4.95

THE BIG BOOK OF GARDEN HENS

F. Raymond

Another excellent book from the same author as Keeping a Few Hens... This time a hardback with colour pics. Info on how to keep chickens, the breeds to choose, a month-by-month guide to what you should think about doing and some lovely recipes for all those surplus eggs. £16.50

FREE-RANGE POULTRY

K. Thear

Best book I have come across on the subject of keeping free-range chickens. Relevant for the large flock keeper or those like me who just keep a few chicks in their back garden. Hardback. £19.95

POULTRY HOUSE CONSTRUCTION

Plans that even I can follow - how to build broody boxes, large arks, small arks, duck nest boxes, bantam houses, feeders, fold units, large hen houses, small hen houses and so on and so forth. Amazing value. £8

DISEASES OF FREE RANGE POULTRY

V. Roberts

Free range birds are usually much healthier than their sad intensive cousins but even they get ill sometimes. Comprehensive sections on anatomy, reproductive bits, digestive systems etc and an excellent chart for common disease identification, includes water fowl, quail etc. £15.99

STARTING WITH DUCKS

Very useful addition to the 'Starting with...' series. Keep a duck or two in your garden and say goodbye to slugs and snails. £7.95

STARTING WITH BANTAMS

Same idea only bantams £7.95

LUCKY DUCKS

P. Thorndyke

Chapter 1 - Your Needs, Chapter 2 - the Ducks' Needs. I love a book that starts like that. A holistic approach to keeping ducks - great creatures and magnificent slug hunters. £9.95

THE SECRET LIFE OF COWS

R. Young

Cows are surprising animals - they can play games, sulk, have preferences, be vain and form lifelong friendships - so says the author, based on her observations of her own herd. A book for all humane cowkeepers, fascinating insights. £14.99

ALL ABOUT GOATS

L. Hetherington

Popular manual at last back in print - housing, feeding, breeding, milking, dairy produce, health and showing. Also a small but interesting chapter on setting up a commercial goat venture. A must for goatkeepers and potential goatkeepers. £15.99

GUIDE TO BEES & HONEY

T. Hooper

Of the 100s of books on this fascinating subject this, in our opinion, is the best one for all round

practical and user friendly information. Updated and including the latest on dealing with the Varroa mite. £9.95

BEEKEEPING FOR BEGINNERS

P. Hands

Nicely produced and illustrated bookette with good, sound advice. £4.95

STARTING WITH PIGS

STARTING WITH SHEEP

Full of essential, practical information these books are written for those new to keeping sheep or pigs. Up-to-date information on regulations and practices. £7.95 each

BACKYARD FISH FARMING

Bryant and others

Hurrah - not back in print but we have acquired a whole, perfect, box of this book. A family could rear enough fish to provide it with at least one meal a week from tanks/ponds in the back garden. Excellent book. £5.95

SELF SUFFICIENCY & SMALLHOLDING

VALUABLE VEGETABLES

Mandy Pullen

Essential reading for anyone thinking of becoming self sufficient in vegetables, earning a living from a box scheme or other enterprise that involves selling vegetables. Complete details from how to choose your land and prepare it, to how to sell your crops, with cultivation details for all the major vegetables, soft fruit and herbs.

Excellent section on polytunnels. See Gardening for more details. £20

BACKYARD SELF SUFFICIENCY

J. French

Self reliance can also mean beautiful as well as productive gardens. We've always liked this self reliance book, from one of Australia's leading eco writers. But we have been unable to get it for a sensible price - now we can and have. Loads of good ideas but don't forget to replace June for December and vice versa. £8.99

WILD FOOD

R. Phillips

There is often more to forage for in the great outdoors than in your own garden. So if you are going to eat from the hedgerows then you need to know exactly what you are eating. Mr Phillips' unique photos of plants, fungi, seaweed and so on, aid such identification. Add to this many mouthwatering recipes and you have a star book. £16.99

HEDGEROW COOKBOOK

Another glorious title from Glennie Kindred - rambling recipes arranged according to the seasons. £4.95

HOW TO ENJOY YOUR WEEDS

A.W. Hatfield

A reprint of a splendid book - detailed descriptions of each species, remedies, recipes, folklore and mythology and the author's own illustrations. A pleasure to read. £9.99

GROWING & USING HERBS SUCCESSFULLY

B Jacobs

Recommended to anyone who wants to grow herbs not only for fun but also for profit. Good sections on markets & marketing, propagating, running a business and making a profit as well as the usual stuff about the specific herbs. £12.95

THE SMALLHOLDER'S DIY

22 self-build projects for the small holder: gates, troughs, saw bench, milking bench, goat house, hay rack - all with working plans. Value for money. £7

THE SCYTHE BOOK

D. Tresemer

We love the kind of eccentric who can write a book about so interesting a topic (and then rewrite an extended second edition). Everything you need to know about mowing

hay, cutting weeds and harvesting small grains with hand tools. The swish of a well swung scythe is a supremely satisfying sound. £12.95

THE SMALLHOLDER'S MANUAL

K. Thear

A bit expensive but a very good hardback book on running your own smallholding. Not strictly organic but sympathetic to organic principles. Very strong on animals (of all types from bees to bullocks) and pasture based activities. It is obvious that the author knows what she is talking about, well presented and level headed. £25

HOW TO DEVELOP A LOW COST FAMILY FOOD STORAGE SYSTEM*A. Evangelitsa*

A bit 'end of the worldy' but some good ideas on how to store all kinds of food. Mostly low tech and eminently implementable (say that after a few beers) £10.95

**HOW TO STORE YOUR GARDEN PRODUCE***P. Warren*

Shows how to store and preserve your garden produce for home grown goodness all year round. Loads of ideas and good recipes in this practical and useful book. Splendid illustrations. £4.95

ONE ACRE AND SECURITY*B. Angier*

First published in 1972 in the States and in print ever since. You don't have to live in the back end of nowhere to be self reliant. An acre will do. £11.95

COTTAGE ECONOMY*W. Cobbett*

Another reprint - written with the aim of instructing the 'country labourer' in keeping bees, brewing beer and other self sufficient essentials, lots of stuff for us to copy. A great rural read - wit and grit shine through. £7.99

HOW TO LIVE WITHOUT ELECTRICITY & LIKE IT*A. Evangelista*

Not just solar stuff but all sorts of fascinating things about heating and cooking; pumping and storing water; light sources - candles, lanterns, oil, kerosene; radios; refrigeration and so on. A must for all self respecting, self reliancers. £10.50

THE NEW WOODBURNER'S HANDBOOK*S. Bushway*

Choose the type of wood burners most appropriate for yourself (includes info on the excellent masonry stoves or kachelofen), the best and most efficient fuel. Good chapter on safety and how to avoid setting fire to your dwelling. Then, let the winter throw at you what it will, you'll be snug and warm. £9.95

THE NEW COMPLETE BOOK OF SELF SUFFICIENCY*J. Seymour*

First published in 1976 and updated regularly after that, this book has yet to be beaten as a general introduction to the topic. The latest edition comes with a huge amount of information from the acknowledged expert. £20

SCENES FROM A SMALL HOLDING*C. Griffin*

Do you want to escape from the rat race? All prospective smallholders and escapees should read this very, very amusing account of the Griffin family's move from urban dwellers to

proud owners of a Welsh smallholding. From the joys of lambing to the terrors of bee-keeping - full of practical information, wry observation and downright madness. A great favourite of mine. £9.95

MUSHROOMS & FUNGI OF GREAT BRITAIN & EUROPE*R. Phillips*

The best book I have found on identification of fungi. The uniqueness of this guide is that each species is accompanied by good colour photos of the fungus in all stages of its development. No substitute for going picking with an experienced fungiphile but the next best thing. £16.99

TREES & WOODLAND**A HANDBOOK OF NATIVE TREES AND SHRUBS***C. Bedoyere*

At last in paperback, this well produced book with lots of lovely pictures is essential reading for anyone wanting to plant a new woodland, good section on native trees. £12.99

COMMON SENSE FORESTRY*H. Morsbach*

Although an American book there is a huge amount of useful information. Conclusively proves that sustainability, sensibility and a generating a reasonable income are not mutually exclusive. Based on 25 years working his own

woodland. Delightfully naive illustrations that get over their point and text that is easy to read, make this one of the better forestry books on offer at the moment. £24.95

GREAT BRITISH TREES

J. Stokes

This book describes 53 individual trees from around the UK with a beautiful photos and interesting text. Beautiful celebration of our arboreal heritage. £7.99

ECOFORESTRY

Drengenson & Taylor

Subtitled 'The Art & Science of Sustainable Forest Use' this important book comprises a collection of writings from 35 of the foremost practitioners of sustainable forestry. It is divided into 5 sections: Ecoforestry principles and practices, maintaining the ecosystem, past & current examples, forestry for the future including bioregionalism and lessons from the forest. Very readable. £18.99

THE GOOD SEED GUIDE

Simple pocket sized booklet with details of how to identify, collect, germinate, sow and plant out native tree seeds. Good value at £3.50

Chris Howkins writes fascinating books on the history, sociology, uses and folklore of trees.

Trees, Herbs and Charcoal Burners - £5

Searching for Hornbeam - £6

The Elder - £3

The Rowan - £3

THE AX BOOK

D. Cook

Why anyone would want to write a book all about axes is beyond me - but Mr Cook has and it's very interesting. History, types of ax, sharpening axes, methods of felling, storing

wood, hazards, saws and other tools etc - all you you could ever want to know about axes and felling trees by hand - not a chain saw in sight. £16.95

Three 'woody' books from the experts at BTCV
TREE PLANTING AND AFTERCARE - Covers planning and design for conservation and amenity; the law; safety; equipment; seed collection; planting; aftercare; species tables; suppliers etc. £13.95

WOODLANDS - Covers management and planning; timber production; the law; safety; equipment maintenance; felling; extraction; conversion and marketing. £13.95

TOOL CARE - A comprehensive maintenance and workshop manual. covers planning, fitting and organising a workshop; repair and maintenance of tools. **£9.95**

A TREE IN YOUR POCKET

J. M. Paterson

A pocket sized version of 'Tree Wisdom' - gives fascinating descriptions of 16 native trees together with the myths and legends, magical properties and healing powers that surround them. £4.99

TREE WISDOM

J. Paterson

A lovely book that takes 17 native trees and looks at the myth, folklore and healing properties associated with each. Full of interesting information. £12.99

WOODLAND WAY

Ben Law

Since his TV appearance building his forest home there has been a lot of interest in Ben's work. A committed and knowledgeable woodsman, he has written this handbook outlining a new and radical approach to sustainable woodland management. This practical and philosophical book should be read by all who care for trees and woodlands. £16.95

GOOD WOOD GUIDE

A useful handbook from FoE. It comes in two parts - the first outlines the cases for more sensitive uses of wood, including a directory of timber: the second is a valuable resource list of reclaimed timber dealers. £7.50

CHARCOAL PRODUCTION - A HANDBOOK

Hollingsworth

Excellent book, comprehensive and accessible information on all aspects of charcoal production. Subjects dealt with include the theory of transformation of biomass to charcoal, traditional kilns, brick kilns, transportable metal kilns, briquetting, analysis of

charcoal, gas production, use of as a cooking fuel and much more. £14.95

- **SPECIAL OFFER:** *Buy this book and get your whole order POST FREE*

CONSERVATION, WILDLIFE & PONDS

HEDGES RESOURCE MANAGEMENT

An excellent guide to looking after your hedge. This illustrated guide discusses the best type of hedge for your needs, planting, conservation and trimming. £9.99

ATTRACTING BIRDS TO YOUR GARDEN

S. Moss

Glossy with great photos, lots of useful information about nesting, habitats, feeding etc with a large directory of garden birds (including the stork!!). £12.99

WILDLIFE IN CHURCH & CHURCHYARDS

N. Cooper

Useful guide to managing churchyards for conservation although most of the info is applicable elsewhere. Habitats covered include trees, hedges, grassland and stonework. £9.95

HOW TO ATTRACT BUTTERFLIES TO YOUR GARDEN

M. Tempion

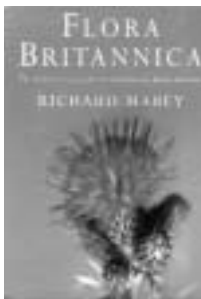

The main butterflies I get in my garden are the flying, white, pestilential sort so I look forward to using this book with interest. It has a huge amount about butterflies, (life cycles, overwintering, feeding habits and so on) written in a

non-patronising way. Good colour pics. £12.95

OAKS, DRAGONFLIES AND PEOPLE

N. Moore

The story of how the author, a respected naturalist, created a small nature reserve near his house in Cambridgeshire. A little technical in parts but easily readable and very interesting to anyone thinking of converting a piece of land to the wild. £15.95

FLORA BRITANNICA

R. Mabey

This is a truly superb piece of work - at its simplest, it is a guide to British wild flowers, plants and trees but each of the 1000 plus species are dealt with in great detail, not only in the botanical sense but also

in the plant's relationship to humanity. Over 40,000 people submitted memories, anecdotes and folk history to the book. This has resulted in a sort of plant Domesday Book for the end of the 20th century. A large format hardback book with over 450 pages and loads of beautiful colour photographs - very much a book to treasure. £35.00

BIRD BAT & HEDGEHOG BOXES

An excellent booklet on how to build same. £1.50

GARDENING FOR BIRDS

S. Moss

The fact is that a good permaculture or forest garden will attract herds of birdlife. However, this is a very useful tome that gives plans, ideas, plant lists and planting guides for all shapes and sizes of gardens, town, suburban and country. What I particularly like are the month by month guides and identification pics. Good value. £9.99

GARDENING FOR WILDLIFE

G. Pilkington

The author's knowledge and love of his subject shine through. Useful tips and sound advice. Turn your garden into an oasis in a chemical wilderness. £4.95

CREATING SMALL HABITATS FOR WILDLIFE IN YOUR GARDEN

J. Briggs

Well produced, sensible and beautifully illustrated book with lots of workable ideas for all sizes of garden. £12.95

THE WILDLIFE POND HANDBOOK

L Bardsley

Don't be deceived by the glossy cover - this book is worth its weight in Gammaridae. If you already have, or want to make a small to medium sized pond, this book from the Wildlife Trusts is for you. £12.99

YOUR WILDLIFE POND*P. Sibley*

If you want to build a wildlife pond in your garden, this is the book for you. Concise, accurate information for only £4.50.

POND LIFE*T. Beebee*

And if you want to know what's going on in your pond - you can't beat this book. Heaps of information (wherein everything seems to eat everything else), excellent line drawings and a nice writing style. £7.99

**EARTH PONDS***T. Matson*

'The Country Pond Maker's Guide to Building, Maintenance and Restoration'.

Splendid book on bigger earth ponds. Obviously written by a chemical hating, natural system-admiring, pond fanatic. Loads of good ideas. £14.95

WILDFLOWERS WORK*Scott, Lickorish & Luscombe*

A technical guide to creating and managing wildflower landscapes. The most complete guide I have come across. If you are working in this field it will definitely pay you to own a copy of this book before you start planning & planting. £17.50 REDUCED to £12.50

Practical books from BTCV - the experts in practical conservation and woodcraft

Hedging - Immensely practical covering landscape; conservation; planting and early care; the law; safety; equipment; trimming; preliminaries; restoring a neglected hedge; laying standard, Midland; and South Western hedges; other regional styles; banking and turfing. £13.95

Footpaths - Revised edition, covering patterns; rights and responsibilities; planning; safety; equipment; clearance; drainage; surfacing; boardwalks; steps; erosion; vegetation restoration; stiles; gates and waymarking. £13.95

Drystone Walling - Covering conservation; the law; safety; equipment; building; maintenance; wall 'furniture' and applications. £13.95

Waterways and Wetlands - Revised edition. Covers ecology; management; the law; safety; equipment; artificial linings; clearance and bank stabilisation; islands and rafts; drainage; dams; weirs and sluices; vegetation management. £13.95

PERMACULTURE**PERMACULTURE ONE***Bill Mollison and David Holmgren*

The book that started it all. Written as a speculative text in 1978, this volume has provided

the conceptual basis for a world wide movement. £9.95

● SPECIAL OFFER: *Buy this book and get your whole order POST FREE*

DAVID HOLMGREN: COLLECTED WRITINGS 1978 TO 2000 (CD)

A collection of 28 articles, conference papers, lectures etc by one of the founders of the movement and all round good guy. Fascinating insights into the principles of permaculture and how it has developed over the years. (CD runs on Macs and Windows) £10.95

PERMACULTURE PRINCIPLES*David Holmgren*

Excellent book - adds greatly to the sum total of permaculture thinking. Provides a solid moral and intellectual basis to an intensely practical subject. This book will have a major influence on the sustainability debate. £18.95

PERMACULTURE - A DESIGNER'S MANUAL*Bill Mollison*

Based on the years of experience of the world's foremost practitioner. Not an easy book for beginners, this hardback book has 600 hundred pages, lots of illustrations and exceptional detail. An essential reference text for all designers of sustainable systems. Early chapters include material on land use, settlement design principles and the understanding of patterns in natural and human systems. Five chapters cover the practical matters of interest to the land use designer: climate, trees and their energy transactions, water, soils and earthworks. Humid tropics, drylands

and cold temperate climates are shown developed in the permaculture style, evidence, if it were needed of the universality of permaculture principles. Aquaculture has a chapter of its own as do the legal, financial and ethical structures required for the development of sustainability. Establishing the importance of integration between people and landscape, this is a truly inspirational book. £42

● SPECIAL OFFER: *Buy this book and get your whole order POST FREE*

PERMACULTURE - A BEGINNER'S GUIDE

G. Burnett

If you don't know what Permaculture is I strongly recommend you read this accessible bookette. Even if you are a fanatical permaculturalist you can buy one, find some new ideas or just give it away to spread the word. Easy to understand, well illustrated and obviously from the heart. £4.95

INTRODUCTION TO PERMACULTURE

B. Mollison

New edition of probably the best introduction to this important global movement. Written by its founder it outlines the philosophy of permaculture as well as giving masses of practical, well illustrated examples. Topics covered include: permaculture principles, designing and zoning, the garden, orchards and farms, small livestock and aquaculture, communities, urban strategies and more. If you are serious about creating a sustainable future, not only in relation to agriculture, but most aspects of human and com-

munity endeavour then this book is a must. £14.95

THE PERMACULTURE TEACHER'S GUIDE

ed Andy Goldring

Essential tool for anyone who wants to get the permaculture message over to the world at large. Lesson plans from all the best p/c teachers in the UK. Actually you don't have to be a teacher to get a lot from this masterwork - can be used by anyone who wants to know more about this world changing movement. £25

MANUAL FOR TEACHING PERMACULTURE CREATIVELY

Robin Clayfield and Skye

Robin and Skye are inspirational teachers who have run courses all over the world. Anyone who has had the pleasure of working with them will recognise the high degree of skill they bring to the teaching of permaculture. They have licensed us at eco-logic to copy their teaching notes which make up a loose leaf file with over 300 A4 pages. The emphasis is on the process of teaching rather than specific information and as such can be used in any situation or location. Masses of games, ideas, extremely good (and funny) graphics, hints, tips and all round top stuff. This manual fairly crackles with creativity. A must for all PC and other teachers. £45.00

FARMING

THE LITTLE BOOK OF ORGANIC FARMING

A fine bookette from the Soil Association intro-

ducing organic farming and giving cogent reasons why we should support it. Buy, read, give to local supermarket manager. £4.50

AGRI-CULTURE. RECONNECTING PEOPLE, LAND AND NATURE

J. Pretty

A pleasantly strange book - part academic but full of real life stories. It envisages a whole new form of food production, based on ecological (that word again) principles could work. Easy but essential reading for all agronomists, farmers or those interested in the future of food production. £14.95

HEDGES

M. Maclean

Low cost effective ways to provide wind protection for crops, contain livestock and improve things generally about the countryside. This book is aimed at the farmer but if taken together with BTCVs 'Hedging' (see Wet and Wild) will give you all you need to know about this subject. £9.99

Three essential manuals with lots of technical information on organic methods for the larger scale producer.

Organic Livestock Farming

Detailed guide to successful production & marketing of eggs, milk and meat. £17.95

Organic Cereals and Pulses

Varieties, crop rotations, weed control guidelines and some good case studies. £17.95

Organic Grassland

Essential for all organic farmers with livestock.
£17.95

ORGANIC FARM MANAGEMENT HANDBOOK

Lampkin & Measures

The bible for the organic farmer - yields, planting density, costs, seed rate and all sorts of other essential stuff for running a profitable and sustainable farm. £12.95

ORGANIC FARMING

N. Lampkin

This massive 740 page book has become the standard text on the topic. Methodology and philosophy clearly explained. All you need to know whether you are an old hand or just starting out. £25

INTERCROPPING & THE SCIENTIFIC BASIS OF TRADITIONAL AGRICULTURE

D. Innes

Based on field studies, this is a scientific look at a topic that is creating a large amount of interest in Europe. Provides ammunition for the move away from mono-cropping to what organic/ permaculture growers have long known. Interesting material, don't be put off by the title. £19.95

ONE STRAW REVOLUTION

Masanobu Fukuoka

....is one of the most radical and influential agrarian thinkers this century. 'One Straw' describes the events that led to the development of Fukuoka's concept of 'natural farming'. In the process we are made to question the current

slavish devotion to modern methods with their increasing reliance on chemical fertilisers, pesticides and ever larger machinery. This book should be read by everyone whether in the world of agriculture or not. £7.95

THE NATURAL WAY OF FARMING

Masanobu Fukuoka

Describes in practical detail the theory and practice of working with Nature in the raising of food crops without cultivation, chemical fertilisers or herbicides, not even any added compost! Instead of looking to do more to his land each season Fukuoka has managed to do less and yet maintain excellent yields from healthy plants. An accessible book with far reaching implications and applications for all. £14.95

THE ROAD BACK TO NATURE

Masanobu Fukuoka

A collection of articles, lectures and essays recording his impressions as he travels the world talking about his revolutionary 'do-nothing' agricultural methods. He is obviously shocked by what he finds, namely that man has created a desert where there once was plenty. As is to be expected there is a spiritual side to a lot of his thoughts, the interdependence of nature, God and man, and an optimism that a change in lifestyles and farming methods could yet heal the Earth's wounds. £13.95

THE HARMONIOUS WHEATSMITH

Mark Moodie

The only text on the Bonfils/Fukuoka no-till methods of cereal cultivation. A delightfully idiosyncratic booklet with quirky illustrations. A text to shift paradigms with. £4.00

BIODYNAMIC AGRICULTURE

W. Schilthuis

Accessible well illustrated book for those who wish to understand the principles of biodynamic agriculture. £7.99

FENCING

BTCV

Immensely practical covering design and siting; the law; safety; equipment; strained, wooden and electric fencing; special uses; gates and stiles. £13.95

FOOD

WHAT'S WRONG WITH SUPERMARKETS

Find out with this fantastic bookette which outlines the problems and suggest sane solutions. Essential reading for just £1

GENETIC ENGINEERING, FOOD AND OUR ENVIRONMENT

A brief but very, very useful guide. Buy it, read it, act on it and pass it on. £3.95

COMING HOME TO EAT

G. Nabhan

Mr. Nabhan, worried as we all are about the globalisation of the food supply chain, decided to try

and eat only what was produced within 250 miles of his home in the Arizona desert. This book chronicles his efforts to eat 'locally' over a year. That the author is an eccentric in the American mould only adds to an interesting and thought provoking read. £10.95

FOOD FOR ALL - THE NEED FOR A NEW AGRICULTURE

J. Madeley

We all know agribusiness has failed to deliver, but what to do and how to replace it. John Madeley looks at the problem and comes up with sustainable, workable solutions (he even mentions permaculture). Well written and argued. £9.99

EATING TO SAVE THE EARTH

L. Reibel

Sadly the eco-logic plan to stuff our ourselves with chocolate and crisps AND save the planet at the same time has been discredited by Ms Reibel's book. This is not just another expose of the American food machine but concentrates on what you can do to rectify the balance. 99% of the ideas and wheezes are relevant in the UK and Europe. Compulsory for every eater. £8.99

CHEESEMAKING AND DAIRYING

K. Thear

Step by step, fully illustrated book from experienced fromager and smallholder. How to make hard and soft cheese, yoghurt, ice cream and butter from cow's, goat's and ewe's milk together with equipment and most other things you need to know. £7.95

THE LITTLE FOOD BOOK

C. Sams

This is the last 'Little' book of anything we sell - the bandwagon has rolled far enough - but to be fair it is an excellent summary of the state of food industry. Full of interesting facts and solid information. £6.99

FAST FOOD NATION

E. Schlosser

A coruscating expose of the fast food industry in America. Read this, weep, then gird your loins to do battle with the fast food industry - prepare yourself they are coming over here. Horrifyingly

KEEPING FOOD FRESH

This book concentrates on traditional but little known French techniques for storing and preserving fresh vegetables and fruit. Discover methods that are less costly and more energy efficient than modern freezing and canning and yet maintain flavour & nutritional value. Fascinating and useful information. £11.95

DRIED FOODS

P. Hobson

Having grown all that stuff, and filled the freezer, you will need to look at a different way to preserve your produce. This book takes a comprehensive look at the many foods that can be dried and the various methods of drying. I was particularly pleased with my own attempts at sun-dried apple leather using the book's instructions. It even tells you how to build your own drier. £9.99

CRAFTS & SKILLS

ENCYCLOPEDIA OF GREEN WOODWORKING

Ray Tabor

Green woodworking is a natural way of working with unseasoned wood to create a huge variety of useful and attractive products. Based on over a

decade of working with green wood Ray Tabor has collected all his knowledge together in this book for beginners and experts alike. Contents include: the nature & properties of wood; creating & maintaining your own woodland; tools & devices; the key skills; fuel; fencing & hurdles; lathes and turnery; baskets; walking sticks; spoons; benches, stools & chairs; garden furniture and much more. The most comprehensive book on this fascinating topic. £16.95

● SPECIAL OFFER: *Buy this book and get your whole order POST FREE*

CRAFTING HANDMADE SHOES

S. Raymond

I've never made my own shoes but feel I ought to be able to. This book provides a useful intro with plans and instructions on how to make some simple footwear. All seems relatively straightforward and do-able. Hardback £19.95

THE PAPERMAKERS COMPANION

H. Hiebert

Calls itself the 'Ultimate Guide to Making and Using Handmade Paper' - not sure about that

but it does contain what you need to know to get papermaking. Building your own equipment; making paper with rags, plants, wood and recycling old paper; making craft papers, coloured papers and watermarking your own paper. Well set out and comprehensible. £12.99

SIMPLE FOUNTAINS

D. Adkins

20 step by step projects to build simple fountains for indoors and out. Minimal environmental benefit but the sound of running water is balm to the soul and it definitely needs balm in these strange times. Good working instructions and neat pics. Hardback and handsome. £19.95

THE COMPLETE METALSMITH

T. McCreight

When they say complete they mean complete. Small scale metalworking of the type you can do in your shed, garage, kitchen etc. Cleverly published as a ringbound book so that it stays open on the bench while you are working, clear instructions and illustrations, charts, tables and so on. £16.95

WIND TOYS

C. Burla

Wind Chimes, windsocks, banners, mobiles, wind vanes - all manner of things to make that spin, sing, twirl and whirl - with patterns, tools, technical tips and colour pictures. Not a battery in sight. £12.99

KITES - A PRACTICAL HANDBOOK FOR THE MODERN KITE FLYER

R. Moulton

New edition, starts with how to make a plastic bag kite and moves on to building the most complex and splendid kites imaginable. Colour pics, flying hints, aerial photography, fighting, person lifting. Great fun. £14.95

NATURAL DYES & HOME DYEING

R. Ardosko

52 recipes for dyes made from natural easily obtained ingredients plus an astonishing amount of information on natural dyeing techniques, history and so on. In print since 1968 and now I know why. £6

THE CRAFT OF NATURAL DYEING

Jenny Dean

Practical handbook of all the wonderful, natural products that can be used to dye material. Shows you how to dye at home using simple equipment. Access the fantastic range of colours from plant stuffs. £7.95

A series of excellent booklets full of useful information all at only £3.50 each.

Dyer in the Garden - common plants for dye with recipes and mordants.

Medieval Dye Pot - history of traditional British dyes like woad.

Everything in the Kitchen Sink - dyeing with kitchen waste.

Calendar of Common Dye Plants - nettle, dock, ragwort and a host of other plants just waiting to be used.

The Beginner Spinner - fleecing, carding, spindle spinning, wheels etc.

The Insatiable Spinner - more details about the fleece from sheep, camelids etc

The Spinners Rymerie - songs, quotes, poems and pics about spinning & weaving

Knitting Handspun Yarns - calculating the correct amount to spin for projects, patterns etc.

LIVING WILLOW SCULPTURE

J. Warnes

Best UK book on working with living willow from master willow worker Warnes. Ornamental fences, twigwams, furniture, it's all here. Clear instructions, good fun. £7.95

THE BLACKSMITH'S CRAFT

Perfectly formed hardback written for the beginner & craftsman alike - equipment, tools, the fire, materials, cutting cold metal, rings, bends and so on. In print since 1952. £14.95

BLACKSMITH'S MANUAL ILLUSTRATED

W. Lillico

Specimens of the smith's work, complete with tricks of the trade and the easiest ways to make a multiplicity of objects. From a forge to a locking bar - if I was a blacksmith I'd buy it. £14.95

THE NATURAL SOAP BOOK*S. Cavitch*

Step by step instructions through the whole fascinating process of soap making together with lots of recipes for all sorts of herbal and vegetable soaps. Interesting how relatively easy it is to make your own soap. £11.99

THE COMPLETE BOOK OF BASKETRY TECHNIQUES*Gabriel & Goymer*

It is what it says it is - though the emphasis is on work with willow. Good clear illustrations of all the various techniques. Highly regarded by basketmakers. £14.99

CULTIVATION & USE OF BASKET WILLOWS

Only book available specifically about growing willows on a small scale to be used in basket making. £6

PLANTS FOR BASKETRY

No frills, bags of info on over 300 species that can be grown and used for basketry. £8.00

BASKET WEAVING WITH NATURAL MATERIALS*P. Dale*

Good for using the irregular forms of slightly unusual materials. As the book is from Australia there are some plants not available here but you can easily find a UK substitute. I was particularly impressed with a project using wisteria cuttings. For the weaver/basketmaker looking for something different. £10.99

JEWELLERY FROM NATURE*C. Yow*

Raid the garden for materials and get jewellery. 45 projects using seeds, twigs, stones, bone and all sorts of other stuff that you can find hanging about outside just waiting to be turned into things of beauty. £12.99

- **SPECIAL OFFER:** *Buy this book and get your whole order POST FREE*

BUILDING TECHNIQUES**THE TYRE HOUSE BOOK***P. Hendricks*

From New Mexico (where else?) comes this interesting book about building with tyres and rammed earth. Very interesting information (and some good technical stuff) which could be used as a basis to plan a UK variant of the tyre house - after all it's not as if we are short of used tyres. £11

BUILDING GREEN**BUILDING GREEN***J. Johnston & J. Newton*

Important guide to using plants on roofs, walls and pavements. Contains chapters on trees and buildings, courtyards, balcony gardens, green walls and other aspects of

sustainable building in cities. The real strength of this book lies in its comprehensive look at the construction and maintenance of green roofs.

Beautifully laid out and illustrated with colour photographs and line drawings, a comprehensive section with relevant technical information and resource list complete this highly recommended guide. Now at less than half price was £12.95, now £6

BUILDING WITH STONE*C. McRaven*

Intro to the craft of crating stone structures - clear simple directions for making walls, arches, fireplaces, buildings and other stony stuff. £14.95

BUILDING STONE WALLS*J. Vivian*

It's about building stone walls. £8.99

BUILDING WITH LIME*S Holmes and M Wingate*

Lime has been used as a building material of thousands of years and this book shows you how. Covering mortars, external walls and interior applications it contains all you need to know. £22.95

THE NARROWBOAT BUILDER'S BOOK*G. Booth*

By popular request a book about fitting out a narrowboat. Building a shell, installing an engine, ballasting, fitting out and, last but not least, painting those lovely designs. Most useful book we could find. £14.99

COMPLETE GUIDE TO LIVING WITH THATCH*M. Billett*

Guides the reader through the development of

thatching, materials used and the artistic work that creates the thatched roof. Contains a wealth of practical information and advice for those who live in or are thinking of buying or building a thatched house. £25

ROOF FRAMING

M. Gross

If you want to put a roof on anything this is the first book you will need. It shows, with measurements and plans how to cut the timber that will make the frame the roof will sit on. Everything from the simplest roof via an irregular shaped roof to the lid for hexagonal gazebo. Technical & authoritative. £15

YOU CAN MAKE THE BEST HOT TUB EVER

Becky Bee

And indeed you can - all you need is an old metal bath, some mud, a few other bits and bobs that you should have in your shed and, of course, this book. Easy to follow instructions - I love it. £10.95

NATURAL PAINT BOOK

L. Edwards

Eco-logic books are publishing their own book about environmentally sound paints. However if you can't wait that long you can try this one. Lots of very good photos and some useful information in a nicely designed book. £16.99

THE NATURAL PLASTER BOOK

Guelberth & Chiras

From the USA so the resource list is not a whole

heap of use but the book is the only one we know to cover earth, lime and gypsum plasters for natural plasters and plastering techniques for natural buildings. £22.50

THE ART OF NATURAL BUILDING

Ed. M.G.Smith

A sort of ecological building encyclopedia with each section written by an expert in the particular field. Excellent starting point in choosing/understanding alternative construction techniques. £21

THE BOOK OF MASONRY STOVES

D. Lyle

Rediscovering an Old Way of Warming - used in central Asia and Europe for centuries masonry stoves present an elegant, efficient and safe way of heating using wood as the main fuel. Easily adapted to a variety of structures this excellent book contains detailed plans and building information. £18.95

BUILDING A WOOD-FIRED OVEN FOR BREAD AND PIZZA

T. Jaine

Comprehensive instructions from the UK on how to build a stone and brick oven to bake bread, pizza and so forth. Also a brief history of wood fired ovens, some good recipes and other bits and pieces. Some skill needed but the end result looks solid and reliable. £9.99

EARTH CONSTRUCTION HANDBOOK

G. Minke

Earth is naturally available and can be utilised

with hardly any environmental waste. This is probably the best of the earth building handbooks - amongst other stuff contents include rammed earth, earthblocks, additives, repair, design, examples of existing structures, weather protection, use as infill and much more. Comprehensive and comprehensible. £49

BUILD YOUR OWN EARTH OVEN

K. Denzer

Comprehensive instructions from the USA on how to build mud/clay ovens to bake bread, pizza and so forth. Starts with the basic model and moves on to aesthetically pleasing ovens in different shapes. Look simple and cheap to make but how they would hold up in our damp climate I don't know. £10.95

LOW COST BUILDING BLOCKS

M. Davis

With the right soil correctly prepared and compressed, it is possible to halve the amount of cement used for block-making. Simple language, good illustrations, excellent intro to stabilised soil block technology. £9.95

BUILDING THE ALASKA LOG HOME

Tom Walker

We were given this title by a customer who knows about these things - easy to follow build a log cabin manual - from felling your trees to log cabin etiquette (yes, there is such a thing) and lots of other goodies. Don't worry about the Alaska bit in the title the techniques are good anywhere where softwood logs are freely available. £22

BUILD YOUR OWN LOW COST LOG HOME*R. Hard*

From the USA where they do these things well - possibly all you need to know to get started on your own woody residence. £14.95

CORDWOOD BUILDING*R. Roy*

Interesting construction method using logs laid end on and surrounded by various mortars (some including sawdust as an ingredient). Examples from round the world plus good building instructions. It seems you can almost buy a load of logs and build your house or shed with them. £21.00

BUILDING WITH STRAW BALES*B Jones*

This comprehensive guide to straw bale building takes you from start to finish on a straw bale construction. An excellent introduction to the topic £9.95

THE STRAW BALE HOUSE*A Steen, B Steen & D Bainbridge*

Plastered straw bale construction is an exceptionally durable, inexpensive energy and resource efficient way to build in a variety of styles and climates. Full details are given about straw bale construction methods and theory as well as retrofitting existing buildings to gain T high insulation, but the book's real strength lies in the inspiration it provides. £25

\$50 AND UP UNDERGROUND HOUSE*M. Oehler*

We are pleased to offer this famous how to design and build underground book. Simple and easy to

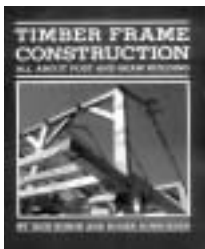

understand, huge amount on the design of your structure - how to get light air, views, keep out damp, drainage, hordes of special features like built in greenhouses, coolers etc. Great stuff. £12.95

\$50 AND UP - 3 VIDEO SET

Mike Oehler runs successful underground building courses all over America and here we have, for the first time, the whole thing on tape. Don't expect heaps of animated this and clever graphics that - basically it is a video of Mike running his course with chalk and talk. Buy this set of videos and we will throw in a 50\$ Underground House Book FREE. Unique information. £85

SOD IT*P. Carpenter*

Great title, informative subtitle - An Introduction to Earth Sheltered Development in England & Wales. After a good general intro to the topic all aspects of earth-sheltered construction are considered, followed up with examples from existing and work in train. Realistic approach to getting planning for an earth dwelling. Best book on the UK scene. £14.95

**TIMBER FRAME CONSTRUCTION***Schroder & Sobon*

All about post and beam building - the theory, joints, wood etc, then plans for a shed to try it all out, then onward & upward to bigger

things. A very popular book and rightly so. £14.95

TIMBER POLE CONSTRUCTION*Follett*

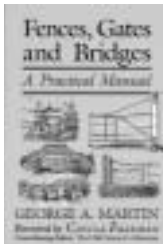

Great introduction to the use of small poles in creating buildings. From chopping down your tree to building your structure - all you need to know for only a tenner. £10

LOW COST POLE BUILDING CONSTRUCTION*R. Wolf*

Based on the use of large telegraph-type poles. No excavation for foundations means that pole building can often be used where other methods are non starters, providing an economical way of erecting a building or structure, excellent for building on slopes. £13.99

BUILDING - INSPIRATION**BUILT BY HAND***Steen Komatsu*

What a wonderful, wonderful book. Given the same material it is amazing the diverse structures that different cultures arrive at. This 460 page book celebrates, through the medium of stunning photographs, vernacular structures hand built from: wood, earth, stone, bamboo, grasses and various combinations of the above; also streets, doors, windows, communities, granaries, embellishments, features and heaps of other stuff. eco-logic's building book of the year - you'll love it. £35

FENCES, GATES AND BRIDGES

G. Martin

A reprint of a book first published in 1887 that illustrates every type of wood and wire, fence and gate you can imagine, and some you can't. Excellent resource book - if

you understand how fences work you are bound to build better ones. £8.95

BARNs, SHEDS AND OUTBUILDINGS

B. Halsted

Same idea as 'Fences' above, only dealing with structures. Wonderful collection of basic designs from rabbit hutches to root cellars, granaries to barns. £10.95

- SPECIAL OFFER: *Buy this book and get your whole order POST FREE*

ECO

E. Wilhide

Divided into 4 sections - basic principles of eco design, case studies, surfaces and finishes and resource list. The bulk and value of this book lies in the beautifully photographed and documented case studies taken from the U.K, Australia, Europe and the USA. Lots of inspiration to be found here, even if you don't have access to land to build your own structure. £25

NEW ORGANIC ARCHITECTURE

D. Pearson

A new book from David Pearson is worth waiting for. A jaunt through the world of modern 'organic' architecture featuring 20 architects from round the world. As you would expect the illustrations are just mouth watering and the range and styles on display inspiring. Get dreaming, get building. £25

HASSAN FATHY

J. Steele

One of the most influential architects of the 20th century. Worked mainly in his native Egypt with local people and local materials to provide high quality, low cost housing. A fantastic pattern for all potential builders of social or co-operative housing. Limited stock. £15

SPIRIT AND PLACE

C. Day

Anything from Mr Day is worth a read. This one explores how to move towards creating places that are physically and psychologically satisfying to the body, soul and spirit. Intellectually rigorous and well worth reading. £25

SHELTER

Ed. L. Khan

If you are over 40 you will probably have owned and cherished this book and just as probably leant it to somebody and not had it back. Now updated and improved and just as much fun. Huge in size (37 x 28cm) and huge in scope this is a book of simple homes, natu-

ral materials and habitations for human beings in all their infinite variety. Laid out in an eye catching way with over 1000 photos and numerous plans, sketches and building instructions. From the smallest bender to the dwelling we dream of building one day. Now is your chance to re-own this piece of environmental drama. £15.99

BUILT ENVIRONMENT

SHAPING NEIGHBOURHOODS

H. Barton & others

One of the few sensible texts we have come across that bridges the gap between community planning and spatial planning with an overall environmental/sustainable emphasis. Spiral bound, loads of illustrations, check lists and case studies - essential for anyone involved in the planning process on the neighbourhood scale. £27.50

SUSTAINABLE HOUSING SCHEMES IN THE UK

Ed. N. White

An essential guide to the broad range of sustainable development projects that are springing up (or have already sprung) all over the UK. 30 projects covered in detail plus info on many more. Excellent resource list, good background material - sadly doesn't mention eco-logic books as a source of sustainable tracts but we (sort of) forgive them. £9

TIMBER BUILDING IN BRITAIN

R.W. Brunskill

The standard textbook on timber buildings. Divided into 4 sections: various timber frame

construction methods, illustrated glossary of terms, survey of timber buildings from Saxon to present times, regional variations. Superb reference work now in paperback. £16.99

ECOHOUSE2 - A DESIGN GUIDE

S. Roaf

Boosted by chapters from such contributors as Christopher Day, the Vales and others this is a must read for anyone contemplating building or renovating their home. Good on natural ventilation, solar hot water, water conservation and low voltage electrics. Also discusses embodied energy in building materials and includes 21 case studies from 15 countries and lots of useful technical details. £24.99

DESIGNING ECOLOGICAL SETTLEMENTS

M & D Kennedy

Reviews the state of best practice with regard to ecological planning and buildings throughout Europe. Lots of small-scale developments and heaps of exciting ideas. Greywater, natural ventilation, healthy buildings, recycled material and so on - it's all in this authoritative hardback. £30

THE NATURAL HOUSE BOOK

D. Chiras

There have been many books with this title - some of dubious provenance. This one, from the highly rated Real Goods stable is the only one I know that covers all the 'alternative' building methods - straw bale, cob, rammed earth, papercrete etc etc. An excellent place to start if you are thinking of building something different. £25

THE NEW AUTONOMOUS HOUSE

B & R Vale

Records the building of the Vales' famous house in Nottingham. Bags of technical information right down to the most detailed level. A must for new builders and can be mined for ideas to adapt existing buildings. Inspirational and practical. £15.99

PRESCRIPTIONS FOR A HEALTHY HOUSE

E. Elliott

Subtitled a 'Practical Guide for Architects, Builders and Homeowners. Looks at all aspects of the construction of a house and offers safe eco-friendly alternatives. Considering we spend 90% of our time indoors it is important to have a safe, pleasant environment - this book points the way. £22.50

HOW TO STOP & INFLUENCE PLANNING PERMISSION

HOW TO GET PLANNING PERMISSION

HOW TO FIND AND BUY A BUILDING PLOT

Three books on the same theme of building & planning permission. All three are clearly written (with lots of diagrams, plans and copies of the forms that may be involved) - by the same authors, Speer & Dade. They are thoroughly recommended for anyone about to engage in the building/planning process - especially self builders and cohousers. £12.50 each

GREEN BUILDING HANDBOOK

Essential for any serious green builders, both volumes contain excellent resource lists.

VOLUME 1: Contents - philosophy and examples, energy, insulation materials, masonry, timber, composite boards, timber preservatives, window frames, paints and stains, roofing materials, rainwater goods, toilets & sewage disposal, carpets & floor coverings. £30

VOLUME 2: Contents - trends, rationale and methodology, fencing, flat roof membranes, glazing, wiring, adhesives, straw bale building, interior decoration, air quality & ventilation. £30

THE SICK HOUSE SURVIVAL GUIDE

A. Hobbs

From the USA, and based on her own experiences this is a good book for anyone trying to come to grips with living in a house that is making them ill. Very good strategies for electromagnetic stress and allergies. £14.99

ECO-RENOVATION

E. Harland

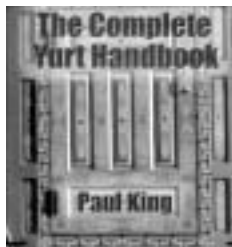

An old favourite, written for the UK, shows how to apply ecological thinking to renovating your house with lots of practical ideas. Don't start work on your castle without consulting it. £9.99

ECOLOGY OF BUILDING MATERIALS

B. Berge

Very pleased to see this book in print. Good information about alternative building materials and how to use them, also gives the technical information that allows theory to be turned into practice. Also impressed with the explanation and importance of 'Life Cycle Analysis' and how to choose one product over another. £31

SHEDS, TREEHOUSES & YURTS

THE COMPLETE YURT HANDBOOK

Paul King

The best book about on yurts and gers. The book is divided into 2 parts. The first deals with the history of the yurt, the principles

behind its construction and form and the traditions and customs of yurt dwellers. The second gives full and detailed instructions on how to make several types of yurt, including instructions on how to build your own 'weekend' yurt. Excellent book, fascinating topic £12.95

Not hugely significant manuals but 4 nicely produced hardback books, in the same series, with good pictures from D Pearson - make good presents - self explanatory titles

TREEHOUSES

YURTS TIPIS AND BENDERS

FREEWHEELING HOMES (CARAVANS AND THE LIKE)

FLOATING HOMES

£10.99 each - SPECIAL OFFER: *Buy all four and get your whole order POST FREE*

LOG CABINS AND COTTAGES - HOW TO BUILD AND FURNISH THEM

W. Wickes

Splendid looking cloth bound hardback - with some interesting and useful information from the USA

where they know how to do these things. Probably enough info to build your own L.C. £9.95

BUILDING GREAT SHEDS

D. Truscott

Inspiration and practical design details come together in this hardback cornucopia of shedness. Starting with a history of sheds (really!!) moving on to siting and planning, materials, tools, actual designs and finishing with retrofitting an existing shed and inspirational structures. £15.99

SHEDS - THE D-I-Y GUIDE FOR BACKYARD BUILDERS

D. Stiles

New, revised and expanded. Want to build a shed then look no further. Working plans -starting with the basic shed and moving on to greater things. Get building. £16.95

THE CABIN

D. Mulfinger

What is a cabin if not a giant shed? Thrill to the stunning photos, plans and interior shots of a huge variety of rustic, retrofitted, traditional and modern cabins. Expensive hardback from the USA that you'll just want to own. Glorious book, I can hardly bear to sell it. £27.50

TREE HOUSES YOU CAN ACTUALLY BUILD

D & J Stiles

A delightful book in two parts. The first part deals with the mechanics, design and construction of tree houses while the second gives plans for 5 actual designs that can be adapted for your own trees. Most of the designs are for children but you can scale up the ideas for adults. Every

garden should have one. £13.95

TREE HOUSES - THE ART & CRAFT OF LIVING OUT ON A LIMB

P. Nelson

Photos of existing treehouses to inspire you, from the ludicrously vertiginous to fabulously

luxurious via a simple child's playhouse. Mix in some plans to help you build your own and you have a book to inspire you to create your very own structure. £13.95

ULTIMATE TREEHOUSES

D. Clark

Latest in a long line of splendid treehouses - nice hardback book with some new additions to available literature - including fairy tale treehouses, history, ideas, future, building techniques etc. £14.99

RUSTIC RETREATS

D & J Stiles

This is a build it yourself guide to all sorts of splendid structures - gazebo, hut, garden pavilion and 17 other structures. Excellent instructions from obvious BYO experts. Get out there and build that sauna hut you've always wanted. £14.95

BUILDING A LOW IMPACT ROUNDHOUSE

T. Wrench

Tony lives in Wales, in a self-built dwelling, on next to nothing. This excellent tome takes us (with illustrations and plans) through the process

he went through to build his roundhouse. Interesting and inspiring. £9.95

HOW TO BUILD YOUR LOW IMPACT DWELLING

Construct a bender, dome, straw bale etc. Low profile publication, high octane info - . £3.50

COMMUNITIES & ECOVILLAGES

ECOVILLAGE LIVING - RESTORING THE EARTH AND HER PEOPLE

ed. H. Jackson

An ecovillage handbook with heavyweight contributions from the great and good of the ecovillage world. Major sections on the ecological dimension - food, building, green business etc; the social dimension - integration, community, lifestyle, communication; cultural/spiritual; process and examples. In my opinion ecovillages and co-housing are the way forward and this and the Co-Housing Handbook are some of the best resources. £17.50

THINKING ABOUT COHOUSING

M. Field

At last a UK published book about Co-Housing - not a 'how to' - more a 'what is' type of book but with some very useful case studies and legal structures. Together with the CoHousing Handbook below you should have all you need to know about this important housing movement which combines communal living with owning your own private space. £7.50

THE CO-HOUSING HANDBOOK

C. Hanson

By far and away the best book on the process of setting up a Co-Housing (or any other new housing) project. It deals with the realities of working with professional architects and the like - those projects we know succeed have an interesting combination of hard-edgedness and altruism. Though American (so the building regs bit is not relevant) it will save a huge amount of time and effort by outlining a workable pattern for getting a project off the ground. Excellent, lucid piece of work. £18.95 reduced to £15.95

CREATING A LIFE TOGETHER

D.L. Christian

'Practical Tools to Grow Ecovillages and Intentional Communities'. The latest guide to launching and sustaining ecovillages and communities based on research from successful communities. Some very interesting facts like communities that eat together more than 4 times a week tend to have stronger 'social glue'. £18

UTOPIA BRITANNICA - BRITISH UTOPIAN EXPERIMENTS 1325 - 1945

C. Coates

A journey through the hopes and dreams which our ancestors had of setting up their own Utopian communities. Fascinating stuff from Anarchy in the Cotswolds to Robert Owen's Harmony Hall. £16.50

COTTERS AND SQUATTERS

C. Ward

Fascinating book that explores the history of squatter settlements in England and Wales. Shows how the 'Diggers' and 'Land is Ours Movement' is a continuation of a old and honourable tradition. Puts it all into historic perspective. Eminently readable with some glorious nuggets of information. £9.99

DIGGER & DREAMERS - 2004

THE guide to communal living - a list of UK communities and a whole heap of articles about living in and setting up communities. A 'must have' book on the topic, new format. £6.50

THE COMMUNITY PLANNING HANDBOOK

N. Wates

A book that packs a punch beyond its price. (That's because all sorts of official bodies up fronted some wedge - and well spent their money is too) Mainly about how people can have a say in shaping their physical environment. Tried and tested techniques, transferable skills, bags of colour photos, charts, plans, diagrams - hugely recommended. £14.95

SUSTAINABLE COMMUNITIES

ed. H. Barton

Looks at the whole idea of developing the conditions for creating what they call 'eco-neighbourhoods'. Academically inclined, with the usual suspects quoted as examples and all the right jargon, BUT well laid out and

includes some significant ideas, nonetheless. £17.95

THE SUSTAINABLE COMMUNITY - A Practical Guide

Based on the successful Hockerton Housing Project this guide aims to help others plan and set up their own sustainable projects. Important, practical information. £7.50

THE COMMON SENSE OF COMMUNITY

D. Atkinson

Practical vision for revitalising local communities, based on developing clusters of local self-governing institutions working together. Interesting ideas, well thought through. £5.95

BUSINESS, CASH & ECONOMY

ETHICAL MONEY

J. Hancock

Subtitled - How to invest in sustainable enterprises and avoid the polluters and exploiters. Very useful with good, clear thinking if you want to invest in an insurance, unit trust, quoted share type of investment. Complete pants if you are looking for a different investment where you have to work a bit harder yourself - like the Ethical Property Company, Baywind and so on. A bit steep in price but you would easily save that money by buying the right product. £17.95

A social enterprise is a business that while being self funding promotes sustainability above the

need for profit. A series of A4 bookettes providing a significant amount of information with case studies based on setting up and running various social enterprises. Social Enterprise Guides to:

HEALTH & SOCIAL CARE FOR THE ELDERLY
HOUSING
RECYCLING
MARKETING A MULTI-STAKEHOLDER
CHILDCARE SOCIAL ENTERPRISE
£12 each

ETHICAL SHOPPING

W. Young

Where to shop, what to buy and what to do to make a difference. For most of us where and how we shop will have the greatest environmental and social impact of all our actions. So it is well worth getting this book and acting on its contents. After a succinct introduction to the topic the book is divided into retail sectors and suppliers are rated with a star system. Don't forget if you choose not to use a shop or buy a product, write and tell them why - if you don't there will be no incentive for them to change. £7.99

SIMPLY THE BEST

Why do they always play that hackneyed Tina Turner platter at conferences? Anyhow this is a great checklist on how to run an event that is as inclusive and as environmentally friendly as possible. Comes in English/Welsh. £12.50

WRITE ON

Set up a 'buy recycled' paper policy for your office and organise an office paper recycling scheme. It's easy peasy with the help of this well

researched document. Interesting myth busting section on the perceived difficulties on using recycled paper. Comes in English/Welsh. £15

AFFLUENZA

D. Wann & others

Affluenza, n. a painful, contagious, socially transmitted condition of overload, debt, anxiety, and waste, resulting from the dogged pursuit of more. This book is packed with stunning facts and rapier-like insights - hugely amusing with an underlying very sharp edge. Shows how we can live a simpler, more meaningful life. £12.99

TO OUR MUTUAL ADVANTAGE

Leadbeater & Christie

Some say the days of the mutual company i.e run for the benefit of the investors or policyholders, is over. We say ha! If we let this happen it would be an outrage. Outlines the case for the retention of mutuals in a refreshingly realistic fashion. £9.95

LETS WORK - REBUILDING THE LOCAL ECONOMY

Peter Lang

Local Exchange Trading (LETS) - trading without money, exchanging goods and services irrespective of your wealth, is expanding all over the place. You don't need anyone's permission and there's no interest to pay. 'LETS Work' describes the principles behind LETS and why it works. Essential reading for all those who want to see local people retaking control of local resources all at a first come first served price of £4.99

SMALL IS BEAUTIFUL - a study of economics as if people mattered*E.F.Schumacher*

I thought everyone had a copy of this book - but it seems I'm wrong. For me it is one of the most significant economic books of the 20th Century. Common sense and visionary and only £7.99

CAPTIVE STATE - the Corporate Takeover of Britain*G. Monbiot*

Mr Monbiot writes very well and this book should be compulsory reading for all. Forewarned is forearmed - redouble your efforts to build sustainable, local economies and lean very heavily on your MP to bin the Private Finance Initiative. Opting out is not an option unless you really want your life to be run by big business plc. £7.99

SUN, WIND & WATER**RAINWATER CATCHMENT SYSTEMS FOR DOMESTIC SUPPLY***Gould & Peterson*

The prime focus of this book is the collection of rainwater for household water requirements - design, construction & implementation of low tech strategies, including how to build various types of rainwater storage vessels, gutters, tanks, materials, construction and some non-technical factors such as water quality and health are addressed. Excellent resource book with lots of case studies from the developing world. £16.95

RAINWATER HARVESTING*Pacey & Cullis*

Similar idea but in not such great depth as 'Rainwater Catchment Systems'. Stuff on storing rainwater, building tanks etc but with the addition of a good section on farming with runoff water in rural areas. Good for developing water strategies. £14.95

FLOWFORMS - THE RHYTHMIC POWER OF WATER*J. Wilkes*

The author is credited with the invention of flowforms and at last he has published an illustrated book showing both the beauty and practical applications of the flowform. Water is so much more than the wet stuff that limps out of your tap and the way we treat it is of crucial global importance. Splendid book. £16.99

SENSITIVE CHAOS*T. Schwenk*

The most interesting source book for the concept of transferring force into physical form. Schwenk's book on the creation of flowing forms in water and air is a must read for anyone interested in understanding the rhythms of water, flowforms etc. A tad expensive but worth every penny. £18.95

PUMPS FROM THE DUMP*S. Gupta*

From India - a little booklet that shows you how to make all sorts of small scale pumps and water transporting materials from inner tubes and other old stuff you may have lying around. Great practical fun. £2.50

OFF THE GRID

How to manage and select independent renewable electricity systems for houses, boats and caravans. Select the method of electricity generation best suited to your needs and goodbye fossil fuel dependence. £6.95

SOLAR HEATING IN COLD REGIONS*J. Rozis & A. Guinebault*

One of the most readable technical guides we have come across. Written for developing countries where the mean temperature is below 10°C, there are heaps of ideas that will be useful in the UK & Europe. Interesting bits about Trombe walls and solar greenhouses - accessible for all levels of expertise. £10.95

SOLAR WATER HEATING - A D-I-Y GUIDE*Paul Trimby*

Build your own Solar Water heating system - the principles, installation details and resource list. And it actually works! £5.95

TAPPING THE SUN - A GUIDE TO SOLAR WATER HEATING

Buy this succinct, good value booklet before you install solar water heating and save a lot of heartache, wasted time and money. £3.50

THE SOLAR HOME*M. Freeman*

'How to design and build a house you heat with the sun' is the subtitle. Not a lot more to add to that. Clear instructions on each phase of building,

from site selection to plumbing wiring etc. £12.95

PRACTICAL PHOTOVOLTAICS - ELECTRICITY FROM SOLAR CELLS

R. Komp

A comprehensive guide to the theory and reality of solar electricity, also a detailed installation and instruction manual. Lots of good technical and practical stuff - enough to construct. £14.95

WHIRLIGIGS AND WEATHER VANES

B. Woods

Fancy a break from the serious business of wind turbines? Build yourself some wind powered whirligigs. Loads of creative projects to make with plans and illustrations, construction techniques and a gallery of great gigs to gawp at. £10.99

WINDPOWER WORKSHOP

H. Pigott

Explains the structure and the theory behind wind generation and then how to build yourself a functioning turbine. Informative and very satisfying. £12

IT'S A BREEZE

H. Pigott

Essential guide to deciding whether you want a wind system, and if you do, which one to choose. £5.99

OUR SIMMERING PLANET - WHAT TO DO ABOUT GLOBAL WARMING

J. Gupta

Do we need to worry, what is the evidence, what is going to be the impact and what can be done? Best overview of this pressing topic. £9.99

THINKING & ACTING

THE MEDIATOR'S HANDBOOK

J. Beer

I've known about this book for ages - now completely revised and updated it remains a standard text. Superb piece of work - starting with what mediation is through to how to do it. Hugely useful for all sorts - business, voluntary groups, schools and small environmental booksellers. £15

ONE MAKES A DIFFERENCE

J. B. Hill

Not as you might think a posh person's guide to self aggrandisement but an inspiring guide to the power of ordinary people to change things. The author spent two years up a tree campaigning to save giant redwoods so she knows a thing or two. Lots of examples and practical actions you can take. One Makes a Difference - one certainly can. £10.95

THE JOY OF NOT WORKING

E.J. Zelinski

Subtitled: A book for the retired, unemployed, and overworked - a fine book from the USA The author and I believe we overvalue work (as in the 'get a proper job' sense). Creative, enjoyable unemployment is the name of the game. Gives a good roadmap as to how to go about achieving this happy state. £12.99

GLOBAL UPRISING - Confronting the Tyrannies of the 21st Century

Welton & Wolf

This book was inspired by the demonstrations at the WTO meeting in Seattle. Over 60 activists give first person accounts of their search for global justice in all sorts of areas like biotechnology, women's rights, sweatshop labour, oppression in Tibet. Great to see the emphasis is on younger activists. An inspiring read. £14.95

SETTING THE WORLD ALIGHT - ideas for social change

From the well respected and generally wonderful Institute of Social Inventions a catalogue of new ideas, schemes and wheezes that people have thought up that could change the world for the better. Hugely inspiring (and some barking) stuff - read it, then go out and change the world. £15

THE BOOK OF BALANCED LIVING

L. Daniels

Sometimes it gets hard to strike a satisfactory balance between home and work. This book should help bring things back to some sort of equilibrium. Usual stuff about identifying where your life is now and where you want it to be, options, identifying opportunities and threats, where to go for more help and information. Differs from the rest in being well written and accessible. £10.99

THE PROCRASTINATOR'S HANDBOOK

R. Emmett

If like me you are an inveterate procrastinator this

will help. And I'll read it as soon as I have a moment (ha ha). £9.99

FUTURES THAT WORK

R. Rehm & others

Subtitled - using Search Conferences to revitalise companies, communities and organisations. Highly effective way of getting all the members of an organisation to point in the same direction. Includes process, principles underlying the method, how to plan one, design tips and examples of successful conferences. I know from personal experience that they can work well - a very useful handbook. £17.99

TAKE IT PERSONALLY

A. Roddick and others

'How globalisation affects you and powerful ways to challenge it'. I'm always a little cynical about 'big name' eco-books but despite a little Saint Anita self style publicism this one is well worth the reading. Well designed, some stunning and thought provoking photographs, easily manageable text and quotable quotes heaped together to open up the real issues. Take it personally - dead right I do. £12.99

THE HIDDEN CONNECTIONS

F. Capra

Fritjof Capras books have always been worth reading and this is no exception. In this book Capra explores how systems work, how global capitalism and eco-design for sustainable communities are on a collision course and how we can change the underlying value systems of the glob-

al economy before it's too late. Good, lucid read. £8.99

ANOTHER WORLD IS POSSIBLE

Fisher & Ponniah

A collection of important themes and voices from the rapidly growing World Social Forum held annually in Brazil with participants from all round the world. An assembly of constructive thinking on globally significant topics - profit, biodiversity, Westernisation, civil society, democracy and so on. An important read. £12.99

THE MIND MAP BOOK

Tony Buzan

Now here's a thing - the very excellent book on thinking methods using mind maps (one of the few ways I know of dealing simply with complex information), out in a new edition, still with the colour pics but reduced significantly in price. Quick, buy a copy before they change their mind. £7.99

WALDEN

H. Thoreau

A classic book written in 1845 which I reread recently and loved. A piece of excellent writing on solitary but not hermit like living, close observation of nature and refusal to work hard to accumulate wealth. Things to identify with. £6.99

THE GOOD LIFE

A collection of essays that explores what we know about happiness, why consumerism is not delivering same and which private and

public strategies could bring about genuine well being. Heavyweight contributors, easy read. £11.95

SILENT SPRING

Rachael Carson

As relevant now as it was 40 years ago. Read it, get angry and change things - it doesn't have to be like this. £8.99

FACTOR FOUR

Weisacker, Lovins and Lovins

Now in paperback, one of my favourite books. It is visionary and yet intensely practical, the accent is on the achievable. It puts the accent on getting more from the resources you use, rather than employing fewer people to do more for less money. 'Factor 4' shows how we can - giving hundreds of actual examples and without inventing new technologies - get to live twice as well, using half as much. Essential reading. £14.99

FACILITATORS GUIDE TO PARTICIPATORY DECISION-MAKING

Sam Kaner

Large format, extremely practical, good graphics, well designed for actual use, the title tells it all. Essential tool for all who would see an end to inconclusive or divisive meetings. £18.50

DO OR DIE - Voices from the Ecological Resistance No.10

Sadly the very last edition of this radical series of books. Crammed with reports and analysis from the very front line of eco-action. Up trees, down

tunnels, social centres, ELF, dealing with GM crops, news and action from around the world. Sure to sell out quickly - get your copy now. £9.95

TRAVEL & TOURISM

THE GREEN HOLIDAY GUIDE TO GREAT BRITAIN & IRELAND

Over 1500 cottages and campsites on organic farms, environment-friendly guest houses and B & Bs compiled by the respected ECEAT (European Centre for

Environmental and Agricultural Tourism). £9.95

THE GREEN HOLIDAY GUIDE TO SPAIN & PORTUGAL

As if you couldn't guess - same as the above only for Spain & Portugal. £7.95

VEGETARIAN BRITAIN £7.95 AND VEGETARIAN EUROPE £9.99

Thousands of places where you can eat, sleep and shop veggie.

VEGETARIAN VISITOR

The annual guide to guest houses, hotels and private homes in the UK. £3.00

DISCOVERING GREEN LANES

V. Belsey

The English countryside was once traversed by a network of green lanes, often in use from prehistoric times. Such long distance routes are part of our living history. This book is the first ever appraisal of the green lane network. Loads of photos and drawings, practical advice on researching green lanes in your area and information on a county by county basis. £6.95

TRAVELLER'S GUIDE TO SACRED ENGLAND

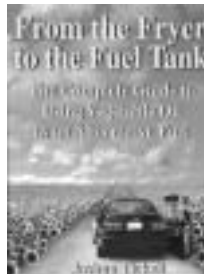

J. Michell

A new revised and updated edition of an old favourite - ruined abbeys, pagan sites, megalithic doodahs. Its forerunner provided me with endless interest in my travels round England. Also available T.G. to Sacred Ireland. £14.95 each

PLACES TO BE

Retreats, course centres, B & Bs, alternative holiday operators, transformational holidays and places just to be. £6.50

URBAN & TRANSPORT

FROM THE FRYER TO THE FUEL TANK

J & K Tickell

Subtitled - How to Make Cheap, Clean Fuel from Free Vegetable Oil. Based on the work of the authors and tested over the 10,000 mile trip of

the now famous 'Veggie Van' this manual shows you how to convert used vegetable oil (of which there is a vast amount washing around the chippies and fast food joints of this fair isle) into a fuel that powers the diesel unit of a car. Everything you need to know and step by step instructions of how to go about it. Create your own biodiesel for only a few pence a gallon. A splendid book. £19.95

● SPECIAL OFFER: *Buy this book and get your whole order POST FREE*

STAR (SCHOOLS TRAFFIC & ACCIDENT REDUCTION PROJECT)

Excellent piece of work - how to collect and analyse data, road safety instructions, environmental issues, health and fitness. No school or youth group should be without it. £15

THE WALKING BUS

A safe way for children to walk to school. Reduce traffic, exercise the youth - set one up now. £3.50

STREET RECLAIMING - Creating Livable Streets and Vibrant Communities

D. Engwicht

From the USA - a whole host of great (and eminently workable) ideas for getting your street back from the traffic. The next step on from traffic calming - convert traffic space to community space. £14.95

COMMUNITY TECHNOLOGY

K. Hess

Published in 1979, based on a fascinating experi-

ment by the residents of a ghetto area in Washington D.C. to achieve self sufficiency. Fish in basements, veg on vacant lots, garbage into fuel, newsletter, heavy duty shopping carts and loads of other radical low tech technologies. First it all went well and then it bombed. There is much to learn so as not to repeat the same errors. Well worth reading. £7.95

CUTTING YOUR CAR USE

A. Semlyen

It's easier not to own a car in the first place - but if you must, you must, so it would be a good idea to read this book. Heaving with useful, practical hints and tips on how to tackle car dependency. If you're already converted get a copy for the car owner in your life. New extended edition. £4.95

THE ULTIMATE CYCLE BOOK

Ballantine & Grant

One for the newer cyclist or as a gift. Most things you need to know to get cycling, basic maintenance, the right bike for you, future bikes and so on. Lots of pics and easy to follow instructions. Well worth £9.99

BICYCLE MAINTENANCE

B. Searle

Save a fortune and give your self a sense of achievement. Step by step instructions, component compatibility, many of a bike's more intractable problems solved, good detail and fine photos and diagrams. Hardback, glossy cover - so you can wipe all that grease off of it easily. £14.99

NATIONAL CYCLE NETWORK

Cotton & Grimshaw

Official guide from Sustrans the creators of the National Cycle Network. Area by area, city maps, bags of info - Accept no substitutes. £10.99

GREENING CITIES

J. Roelofs

'Building Just & Sustainable Communities' a splendid, practical book that looks at all the aspects that a city would need to encompass to become 'sustainable'. Among the topics covered are; urban design, energy, water, waste, food & agriculture, health, economy, recreation and culture as well as an analysis of what makes a 'green city'. Containing a vast number of examples, this is definitely a 'how to' book. We love it. £18.99

YOUTH

JUNGLE ROCK

J. Thres

We loved this comic book tale of skullduggery and greed set in a town somewhere in England and the Amazon Rainforest. Will Dex Dipper - Environmental Investigator, overcome all the odds and some pretty dodgy characters to save the Pepe the penultimate parrot. For ages 7 - 70 a great cartoon strip with good dialogue and a green message. £4.99

WHAT CAN YOU DO WITH A PAPER BAG?

J. Cressy

Hats, wigs, crowns, helmets and headresses - as an

inveterate paper-bag-on-head-wearer I really like this book. Clear instructions, good photos, fun end product. £11

101 GAMES FOR SOCIAL SKILLS

H. Sonnet

Packed with generally creative and dynamic games (and a few rather sad games) to help develop positive social relationships. Would work at many level from youngsters to young adults. Best for parties, groups, classes etc. £14.95

THE PROCRASTINATING CHILD

R. Emmett

Why wasn't this book available when my youth were younger. Could be a godsend to several parents out there. Lighthearted but (seemingly) effective strategies. £9.99

EARTH FRIENDLY CRAFTS FOR KIDS

H. Smith

50 fabulous things to make from recycled stuff - much better than the usual wimpy things they ask kids to make from junk. My personal favourite - the recycled rain stick. Hardback £15.99

DONE IN THE SUN

A. Hillerman

For age 6 and up this book teaches the basic principles of solar energy while giving fun experiments for home and school. £5

THE NEW JUNIOR GARDEN BOOK

The subtitle says 'Cool projects for kids to make

and grow' - that seems about right. £11.95

KIDS PUMPKIN PROJECTS

They're big, they're orange and they're great fun. From planting to carving (with recipes for all that left over pumpkin). 4 - 10 years. 6.95

WHAT IF?

Manning & Granstrom

4 - 6 year olds. Nice story, good illustrations with useful stuff about recycling woven into the story. Not preachy. £4.99

CHILDREN'S PARTY BOOK

P. Thomas

Wish I'd had this book when my girls were younger - 240 games and activities mainly for the 3 - 9 age range. Good index of games by type of activity and age. What joy and not a Ronald McDonald in sight. £12.99

FESTIVALS, FAMILY & FOOD

Large & Carey

Written for those with children, this activity resource book explores the festivals that are scattered throughout the calendar. Grouped into the four seasons with added sections on birthdays, rainy days, convalescence etc. Loads of songs, games, activities and recipes - the answer for every parent who's ever been asked the question - 'What can I do now'. £10.99 - a bargain

PLAY LIGHTLY ON THE EARTH

J. Horsfall

Nature activities for 3 - 9 year olds. There's noth-

ing a parent likes more than a game with a hidden educational content and this tome has loads of 'em. Fortunately children seem to like them too. £11.99

POND ACTIVITY BOOK

WOODLAND & HEDGEROW ACTIVITY BOOK

Loads of fun and dozens of useful activities these 2 books - primary level, photocopyable pages. £13.95 each

MISCELLANY

GREEN VOLUNTEERS

F. Ausenda

3rd edition - fully revised and updated. Specialises in nature conservation type projects anywhere in the world. Short and long term projects, internet updates, good source book. £10.99

THE LITTLE EARTH BOOK

J. Bruges

Never thought I'd say it about this type of book but I picked it up and couldn't put it down. All sorts of eco issues tackled in small accessible chunks, no easy rides - good, hard edged stuff. A must. £6.99

DOWSING FOR BEGINNERS

R. Webster

Learn how to use the tools of dowsing: angle rods, pendulums, wands, dowsing from maps, even using your own hands and body. Then just go and do it Apparently anyone can dowse (except me it seems) and this is just the book to get started on this fascinating skill. £8.99

THE NATURAL DEATH HANDBOOK

N. Alberry

New updated edition of this essential work. Organising inexpensive, environmentally friendly funerals, woodland burials, living wills, dying at home, best funeral directors, cardboard coffins & much more. Take control now, don't wait until it's too late. £12.99

AFTER LIFE

From the Natural Death Centre this book acts as an appendix and update to the New Natural Death Handbook. Subtitled 'Reports from the Frontline of Death' find out the latest from this taboo busting organisation. £6.50

DEAD GOOD FUNERALS BOOK

S. Gill & J. Fox

A practical manual that shows you how to organise your own funeral celebration. Don't underestimate the damage of a conveyor belt funeral. Great book,

tells you what you can & can't do, gives masses of ideas & examples. £9.95

DEAD GOOD BOOK OF NAMING AND BABY WELCOMING CEREMONIES*Ed J.M. How*

Another great book from the Engineers of the Imagination - self explanatory title. £7.95

THE HEMP HANDBOOK*G. Schreiber*

Demythologises cannabis and its byproducts - contains detailed info on how to benefit from it's medical properties, recipes for beauty products, healthy eating and so on. Revised to take into account latest medical investigations. £10.99

WHISTLEBLOWING AT WORK*Ed. D.B. Lewis*

If you find your employer is doing something immoral or unspeakable what do you do? Hopefully you will find the courage and support to speak out. This book will help you. Also looks at how managers should approach the issue. Good, sensible balanced book with case studies. Was £10 now only £5

EYES ON STALKS*J. Fox*

Never sure where to put work by one of my all time heroes. John Fox has been the artistic director of Welfare State, he has been involved in some of the best community events ever staged. This book brings to life the company's working practices with chapters on devising events, lantern parades, funeral and naming ceremonies and all the other things they do so well. Inspirational -

don't put on an event with reading this first. £14.99

**THE COMPLETE FUNDRAISING HANDBOOK***Clarke & Norton*

Substantially revised and updated. If you need to raise money for your local group - start here and save yourself a lot of heartache. £14.95

BETTER BASICS FOR THE HOME*A. Bond*

A compendium of practical information - recipes, tips and guidelines for creating a simpler, cheaper and environmentally safer lifestyle. Household cleaners, body care, gardening, laundry, insect repellents, stains and heaps more. £13.95

SEAWEED - A USER'S GUIDE*S. Gwent*

Seaweed has so many uses: medicinal, health cosmetic, as a fertiliser, an animal feed and of course we can eat it. Good identification and habitat info. £12.99

**SANDCASTLES***P. Mitchell*

25 projects for a bevy of beach buddies. Castles, dragons, mermaids, monuments, sailboats etc etc. 'Sandcastles' even has laminated pages so you can take

it to the beach with you. Don't leave home without it. £11

CHEMISTRY IN THE MARKETPLACE*B. Selinger*

The fifth edition of this splendid reference book which explains the chemistry behind everyday life in an easy to understand way. Things like perfumes, soil chemistry, batteries, food and additives etc. etc. are laid bare to the inquiring mind. If you are going to deal with the world around you it is best to understand it. Hugo's absolute favourite book. £24.95

69 USES FOR A WATER BOTTLE

Plastic water bottle that is - some are fun, some are useful, some are ridiculous. £5
